

iCub::learningmachine  
::Kernel

```
graph BT; RBFKernel[iCub::learningmachine::RBFKernel] --> Kernel[iCub::learningmachine::Kernel];
```

The diagram illustrates an inheritance relationship between two classes. At the bottom is a white box labeled 'iCub::learningmachine::RBFKernel'. A blue arrow points upwards from this box to a gray box at the top labeled 'iCub::learningmachine::Kernel'. This indicates that RBFKernel inherits from Kernel.
