This diagram illustrates a file dependency structure. At the top is a header file, `embot_tools.h`, located at `icub-main/src/libraries/icubmod/embObjLib/tools/`. Below it are two source files: `PeriodicEventsVerifier.cpp` on the left and `embot_tools.cpp` on the right, both located at the same directory path. Blue arrows point from each source file to the header file, indicating that both source files include this header.
