

icub-main/src/tools
/FirmwareUpdater/mainwindow.h

```
graph BT; A["icub-main/src/tools /FirmwareUpdater/main.cpp"] --> C["icub-main/src/tools /FirmwareUpdater/mainwindow.h"]; B["icub-main/src/tools /FirmwareUpdater/mainwindow.cpp"] --> C;
```

The diagram illustrates a dependency relationship in a C++ project. At the top, a grey rectangular box contains the header file path: `icub-main/src/tools /FirmwareUpdater/mainwindow.h`. Below this box are two white rectangular boxes. The left box contains the source file path: `icub-main/src/tools /FirmwareUpdater/main.cpp`. The right box contains the source file path: `icub-main/src/tools /FirmwareUpdater/mainwindow.cpp`. Two blue arrows originate from the top-right corner of the left box and the top-left corner of the right box, both pointing towards the bottom edge of the top grey box, indicating that both source files include or depend on the header file.
