

yarp::dev::DeviceDriver

yarp::dev::IMultipleWrapper

skinWrapper

```
graph BT; skinWrapper --> DeviceDriver[yarp::dev::DeviceDriver]; skinWrapper --> IMultipleWrapper[yarp::dev::IMultipleWrapper];
```

The diagram illustrates a class hierarchy. At the bottom is a gray box labeled 'skinWrapper'. Two blue arrows point upwards from 'skinWrapper' to two white boxes at the top. The left white box is labeled 'yarp::dev::DeviceDriver' and the right white box is labeled 'yarp::dev::IMultipleWrapper'. This indicates that 'skinWrapper' inherits from both 'yarp::dev::DeviceDriver' and 'yarp::dev::IMultipleWrapper'.
